## **Login**

The initial dashboard consists of a login page, where the admin, student or teacher can select their roles, select the department, the class and log into their respective dashboards using their username and password.

## **Three Dashboards**

### **Admin - (HOD)**

Once logged in, the admin can register, view, delete and update teachers.

### **Teachers**

Once logged in, teachers can change their password and update their profile.

Registration of students is done by the teachers for their respective classrooms.

In their dashboard, teachers can upload student attendance details, course materials and student internal and external scores.

Teachers can also upload regular assignments.

Teachers can schedule appointments with students.

### **Students**

Once logged in, students can change their password.

In their dashboard, students can view their attendance, view their scores, view course material and update their profile.

Students can also upload internship certificates and enter feedback.

Students can answer assignments.

Students can request appointments with different teachers.

### **Manage Teacher (by Admin)**

1. In the admin's dashboard, there are widgets to add new teacher, view teachers list.
2. A teacher can be added either by clicking on the add new teacher widget or via teachers list.
3. In order to edit the details of a teacher, the user can do so via the teachers list.
4. A teacher can also be deleted via the teachers list.

*Dashboard -> Teachers List -> Manage Teachers*

The following details are shown when a teacher is selected from the teachers list.

Faculty Name	Name of the teacher
Faculty ID	Faculty ID of the teacher
Department	Teacher's department
Designation	Teacher's designation
Edit details	Widget for admin to edit details of teacher
Delete Teacher	Widget for deleting a teacher

### **Manage Student (by Teacher)**

1. In the teacher's dashboard, there are widgets to add new student, view students' lists.
2. A student can be added either by clicking on the add new student widget or via students list.
3. In order to edit the details of a student, the user can do so via the students list.
4. A student can also be deleted via the students list.

*Dashboard -> Students List -> Manage Students*

The following details are shown when a student is selected from the students list.

Student Name	Name of the student
USN	USN of student
